## Medical Isolation Eye Mask, Hand & Foot Covers

The medical isolation eye masks and hand/foot covers produced by our company are suitable for medical staff to assist in the treatment of neonatal jaundice. When newborns need phototherapy, they can significantly prevent blue light irradiation from stimulating and harming the babies' eyes. They can also protect the eyes of full-month newborns, block strong visible light, and safeguard newborns from the stimulation and damage of strong light.

### Product Specifications

The hand/foot covers are in one-size-fits-all, and the eye masks are available in three sizes: S, M, and L:

Hand cover size: 10.1cm×8.0cm (±2cm);

Foot cover size: 10.1cm×8.5cm (±2cm);

Eye mask sizes:

L size: Length 20cm (±3cm)×Width 5.5cm (±2cm);

M size: Length 16cm (±3cm)×Width 5.5cm (±2cm);

S size: Length 14cm (±3cm)×Width 5.5cm (±2cm);

### Product Advantages

1. Breathable light-blocking pad: Effectively blocks blue light and other strong light to prevent stimulation and damage to babies' eyes;
2. High-quality elastic band: Made of environmentally friendly and skin-friendly elastic materials tested for biological properties, comfortable, soft, moderately tight, and non-allergenic;
3. Customized high-quality magic tape for children: It can be stuck immediately, with firm adhesion, not easy to tear off by gentle pulling, and can be used multiple times;
4. Filed as Class I and Class II medical devices, individually packaged, and customizable for printing.

## Elastic Leg Sleeves, Arm Sleeves, Medical Elastic Hand & Foot Covers

Medical composite elastic hand/foot covers, leg sleeves, and arm sleeves are used to assist in the rehabilitation of sports injuries, postoperative wound recovery, and postoperative recovery from body shaping surgeries, etc., with the following characteristics:

1. Softness: Soft hand feeling, breathable and comfortable;
2. High elasticity: Moderately tight, can be stretched outward with slight force, with a stretching ratio of up to 2.5 times, and can rebound naturally;
3. Waterproofness (arm sleeves): Effective waterproof and liquid-proof performance to protect the injured area from exudation and infection.

## Disposable Medical Elastic Underwear

The disposable medical health elastic underwear has the advantages of comfort, softness, breathability, etc., and the surface is not easy to pill. It is suitable for sensitive skin such as children, pregnant women, and the elderly, and will not cause adverse reactions such as itching, redness, and sensitivity.

Product Characteristics :

1. Softness: The fabric is soft and has good air permeability;
2. Comfort: Flexible and not tight, not easy to produce marks, and no discomfort when worn;
3. Environmental friendliness: Meets the requirements of biocompatibility.

## Mask Elastic Earloops

The mask elastic earloops can be easily stretched with force, rebound naturally after unloading, are skin-friendly and environmentally friendly, breathable and not stuffy, and can reduce the burden on the ears.

Product Characteristics :

1. Softness: Soft hand feeling, breathable and comfortable;
2. High elasticity: Moderately tight, flexible, can be easily stretched outward, with a stretching ratio of up to 2.5 times, does not strangle the ears, is comfortable to wear, and can rebound naturally;
3. Environmental friendliness: Meets the requirements of biocompatibility.
